

Solidum Cat Bond Fund I - classes August 31, 2025

Fund objective

The Solidum Cat Bond Fund is an open-end fund registered in Liechtenstein as a UCITS pursuant to Liechtenstein law in the legal form of a trust (UCITS V). The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of catastrophe bonds or notes and other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment.

In addition to its functional currency USD, the Fund offers CHF and EUR share classes. The equity capital of the CHF and EUR share classes is hedged to reduce effects of FX effects.

Manager comment

The fund achieved in the reporting month a very pleasing return of 1.13% to 1.51% in the three institutional classes.

Since all reinsurance programs with coverage components for US hurricane risks have already been placed, issuance activity for catastrophe bonds was largely dormant, with only one exception. A wildfire protection transaction was completed for the "Los Angeles Department of Water & Power", a regional energy provider.

Global storm activity in (sub-)tropical regions has remained relatively moderate so far. Although Hurricane Erin, a Category 5 storm, formed in the mid-Atlantic, there was no significant activity in any basin that experienced a landfall event causing significant damage.
