

Solidum Event Linked Securities Fund Limited - SAC Fund 2

Classes A-1
April 30, 2024

Fund objective

The Solidum ELS Fund is an open-end fund registered in Bermuda. The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of insurance linked securities which can have the structural format of catastrophe bonds, notes and derivatives, industry loss warranties, sidecars, reinsurance contracts or other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment. Leverage can be used in order to enhance investment returns, and active hedging may be employed to minimize downside risk. In addition to its functional currency USD, the Fund offers CHF, EUR and GBP share classes. The equity capital of the non-USD share classes is hedged to reduce FX effects. Institutional share classes are available for investments above defined thresholds.

Manager comment

The Fund reported earnings of 0.47% in its functional currency class. Results in the other currency classes were lower by the corresponding interest rate differential due to the lower money market base of the Euro and the Swiss franc.

For the first time after an extended period of rising prices, the Cat Bond market saw price reductions in April, with corresponding widening of risk spreads. This dynamic was also reflected in new issues, which could only be placed at the upper end of the initial coupon guidance. Part of this dynamic is due to normal seasonality, which causes the prices of tradable ILS securities to fall as the hurricane season approaches. At the same time, a certain excess demand for Cat Bonds that persisted during the last months has subsided. Hence the secondary market, which now appears to be balanced, provides now a realistic picture of the continuing very attractive risk premia. The conditions for private contracts in the reinsurance market confirm the picture of a tight reinsurance market particularly in Florida, but also in the Carolinas and Louisiana, with potential capital shortages and therefore attractive investment opportunities for ILS investors.

The most noteworthy insurance event of the reporting month was the M7.4 earthquake on Taiwan's east coast south of Hualien City. The tremor was the strongest quake on this highly exposed island since the devastating "Chi-Chi" event in 1999. Despite the strengths of the earthquake, fortunately only ten people were killed during the event, an excellent record, which is primarily due to the strict building regulations in Taiwan. The event is not expected to have an impact on the portfolios of the Solidum Funds.
