

Solidum Event Linked Securities Fund Limited - SAC Fund 2

Classes I-1 and I-2

January 31, 2025

Fund objective

The Solidum ELS Fund is an open-end fund registered in Bermuda. The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of insurance linked securities which can have the structural format of catastrophe bonds, notes and derivatives, industry loss warranties, sidecars, reinsurance contracts or other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment. Leverage can be used in order to enhance investment returns, and active hedging may be employed to minimize downside risk. In addition to its functional currency USD, the Fund offers CHF, EUR and GBP share classes. The equity capital of the non-USD share classes is hedged to reduce FX effects.

Positive month (since inception)	86%			

Manager comment

January 2025 constitutes the second time during the last 28 months that the Fund has to report a negative result, with about minus 1% in the functional currency USD class. The result was driven by the two severe fire events in the Los Angeles area. The Palisades and the Eaton fires both erupted on January 7 and were fully contained only early February. The California Department of Forestry and Fire Protection (Cal Fire) ranks them 2nd and 3rd in its list of most damaging fire events. However, this list is based on the number of affected structures, and given the on average higher value of homes in LA it is expected that the financial impact of the Palisade and the Eaton Fire will top every previous insurance loss caused by wildfire in the US.

The exact impact of the two fires is only slowly becoming clearer. Cat Bonds with per occurrence coverages will not be broadly affected by the event. Loss of principal may occur only in isolated cases, depending on riskiness and the exact locations of the insured properties in the books of the sponsors. Aggregating cat bonds will experience a marked erosion of retentions, with corresponding increase of riskiness for the remainder of their respective risk periods. Secondary market prices at the end of January reflected this situation and led to **valuation volatility for the month. The Fund's private transactions are not affected by these events.**

On the primary market side, the issuance activity did not drop with the ending of the last year. About one dozen new Cat Bond programmes with 25 different layers and tranches were marketed in January, bringing around 2.5 Bn. USD of new paper to the market. Interestingly, several Floridian insurance companies are among the sponsors of these bonds, intending to secure their reinsurance programmes that start in June or July well in advance of the normal mid-year renewal period.
