

Solidum Event Linked Securities Fund Limited - SAC Fund 3

Classes I-1 and I-2
May 31, 2025

Fund objective

The Solidum ELS Fund is an open-end fund registered in Bermuda. The Solidum ELS Fund - SAC Fund 3's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Solidum ELS Fund - SAC Fund 3 holds a portfolio of mostly illiquid insurance linked securities such as reinsurance and retrocession contracts, cat bonds or other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment. Leverage can be used in order to enhance investment returns, and active hedging may be employed to minimize downside risk. In addition to its functional currency USD, the Fund offers a CHF share class and other currency share classes upon request. The equity capital of the non-USD share classes would be hedged to reduce FX effects.

Manager comment

The performance in May for the fund's functional USD currency class was 0.51%. For the currency-hedged CHF classes, the base interest rate differences to the US Dollar brought the yield to 18 and 19 basis points respectively.

With the hurricane season closing in, many customers continue to seek coverage for their insurance books, and so May has historically always been an active month for new cat bond issues or for finalizing reinsurance programs, which provides opportunities for private investments. This was no different this year, and nearly 20 cat bond issues were placed with close to USD 6 billion of notional value. The main focus of the issues lay on US hurricanes: Texas, Florida, and the Northeast. But earthquake risk also came to the market with coverage for Germany, Italy, and Japan. The fund has selectively supported transactions, is fully invested as of the end of May, and is thus well positioned for the hurricane season, which officially began on June 1.
