

Solidum Event Linked Securities Fund Limited - SAC Fund 3

Classes I-1 and I-2
March 31, 2026

Fund objective

The Solidum ELS Fund is an open-end fund registered in Bermuda. The Solidum ELS Fund - SAC Fund 3's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Solidum ELS Fund - SAC Fund 3 holds a portfolio of mostly illiquid insurance linked securities such as reinsurance and retrocession contracts, cat bonds or other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment. Leverage can be used in order to enhance investment returns, and active hedging may be employed to minimize downside risk. In addition to its functional currency USD, the Fund offers a CHF share class and other currency share classes upon request. The equity capital of the non-USD share classes would be hedged to reduce FX effects.

Manager comment

The fund generated a return of 0.71% in USD, its functional currency class. The gain in the fully hedged CHF classes was reduced by the interest rate differential to USD and lay between 41 and 43 basis points.

There were some, partly severe weather outbreaks with hail, tornadoes, etc. in the Midwest of the United States, which are likely to cause damages of several billion USD to the insurance industry as a whole. The fund was only marginally affected by these events: the aggregated loss exposure increased slightly for some positions, but remained well below the forecasted path and thus had no impact on their valuation.

So far, the market has shown itself to be very resilient to the macroeconomic disruptions caused by the war in the Middle East, as was to be expected. Since the dominant event risks for the fund such as hurricanes, earthquakes, severe convective storms and wildfires are not related to military conflicts, the correlation of this asset class to geopolitical drivers is very low and is only influenced by the liquidity requirements of some market participants. We continue to expect slightly higher price volatility in the secondary market indications and possibly an increase in the base interest rate in US dollars, should energy prices remain at a high level in the medium term.

The ILS asset class once again proves its characteristic as a stabilizing element in portfolio construction.
