

Solidum Cat Bond Fund R - classes January 31, 2026

Fund objective

The Solidum Cat Bond Fund is an open-end fund registered in Liechtenstein as a UCITS pursuant to Liechtenstein law in the legal form of a trust (UCITS V). The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of catastrophe bonds or notes and other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment.

In addition to its functional currency USD, the Fund offers CHF and EUR share classes. The equity capital of the CHF and EUR share classes is hedged to reduce effects of FX effects.

Manager comment

The Solidum Cat Bond Fund started the new year promisingly, achieving between 25 and 57 basis points in the various currency classes.

With the exception of winter storm "Fern", it was a relatively quiet month in terms of events. Mid-month, winter storm "Fern" affected large areas of the United States, from Texas to Maine. While bitter cold and heavy snowfall can occur every year in the North and Northeast of the United States, this time it was unusually cold in the South as well. As almost always, the media **hype**—some commentators called it the "Storm of the Century"—was inversely proportional to the actual damage in the real world. Of course, the event caused insured losses to houses, cars, and infrastructure, as well as power outages, which could lead to subsequent damages such as burst water pipes, particularly in the Southeast, which is less well prepared for harsh winter conditions. However, these damages are significantly lower than those of winter storm "Uri" (2021), one of the most severe winter storms of the last years, and are likely to amount to a few billion dollars. The positions in the portfolio are therefore not affected.
