Fund objective

The Solidum Cat Bond Fund is an open-end fund registered in Liechtenstein as a UCITS pursuant to Liechtenstein law in the legal form of a trust (UCITS V). The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of catastrophe bonds or notes and other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment.

In addition to its functional currency USD, the Fund offers CHF and EUR share classes. The equity capital of the CHF and EUR share classes is hedged to reduce effects of FX effects.

Manager comment

In July, the fund achieved an attractive return of 0.54% to 1.0% in the three currency classes.

During the month, the issuance activity for catastrophe bonds slowed down, which is in line with the normal annual seasonality pattern. Most reinsurance programs with coverage components for US hurricane risks are at this point already fixed for the upcoming hurricane season.

The most remarkable event in the reporting month was a strong earthquake near the Kamchatka Peninsula in the Russian Far East. With a magnitude of 8.8, it was one of the strongest earthquakes in the world in the last 100 years. In the seismically extremely active Kuril-Kamchatka subduction zone, where the Pacific plate is sliding under the North American plate at a rate of ~80 mm per year, earthquakes of this magnitude are not unusual. There have been a dozen events with a magnitude greater than 8.1 in the last 100 years.

The quake triggered a locally significant tsunami on the sparsely populated Kamchatka coast. Its remarkable strength prompted the Pacific Tsunami Warning Center to issue a tsunami warning for the entire Pacific. Reports from Hawaii and Japan indicated local waves between 30 cm and 1 meter. The fund is not affected by this event.
