

## Solidum Event Linked Securities Fund Limited - SAC Fund 2

Classes A-1  
November 30, 2024

### Fund objective

The Solidum ELS Fund is an open-end fund registered in Bermuda. The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of insurance linked securities which can have the structural format of catastrophe bonds, notes and derivatives, industry loss warranties, sidecars, reinsurance contracts or other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment. Leverage can be used in order to enhance investment returns, and active hedging may be employed to minimize downside risk.

In addition to its functional currency USD, the Fund offers CHF, EUR and GBP share classes. The equity capital of the non-USD share classes is hedged to reduce FX effects. Institutional share classes are available for investments above defined thresholds.

HFRI FOF	0.13

### Manager comment

In November, the fund achieved another strong performance across all currency classes. With the end of the tropical storm season, the final premium components of hurricane-exposed contracts amortized, and in parallel, the prices of similarly exposed cat bonds rose in the cat bond market.

The consequences of the severe flooding in Spain, triggered by the heavy rains of a weather phenomenon known as 'Gote Fria' at the end of October, became clear in the first week of November. As a result of the floods, at least 230 people died, and an estimated more than 60,000 homes and 115,000 cars were damaged or destroyed. Estimates put the total insured loss at around €4bn. A large part of that sum will be covered by the state-backed insurance consortium Consorcio de Compensación de Seguros. The event had no impact on the fund.

The Philippines saw an active cyclone month, with four systems making landfall or coming very close to the coast on the northern main island of Luzon. However, such high activity in the western Pacific is not unusual in autumn. No significant loss to the reinsurance industry occurred.

Submissions of reinsurance contracts for the 2025 renewals show a premium level consistent with developments in the cat bond market, where almost \$1bn of new bonds were issued during the month and just over \$2bn came into the marketing phase. While spreads have come down slightly compared to the start of the year, they remain at a high level on a risk-adjusted basis.
