

Fund objective

The Solidum ELS Fund is an open-end fund registered in Bermuda. The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of insurance linked securities which can have the structural format of catastrophe bonds, notes and derivatives, industry loss warranties, sidecars, reinsurance contracts or other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment. Leverage can be used in order to enhance investment returns, and active hedging may be employed to minimize downside risk.

In addition to its functional currency USD, the Fund offers CHF, EUR and GBP share classes. The equity capital of the non-USD share classes is hedged to reduce FX effects. Institutional share classes are available for investments above defined thresholds.

Manager comment

October was marked by Hurricane Milton. The Cat Bond market saw high volatility in pricing with wide bid/ask spreads on regionally exposed risks at the middle of the month. Towards the end of the month, the market calmed down significantly, an indication that the reinsurance industry views Milton as less severe than Hurricane Ian in 2022. As a result, the fund ended October with a positive performance across all currency classes.

Hurricane Milton developed very quickly in the Gulf of Mexico from a tropical disturbance to a Category 5 hurricane. However, it was also evident early on that the storm would weaken significantly before making landfall in Florida due to adverse atmospheric conditions. Officially, Milton then made landfall as a Category 3 storm, but reports of measured wind speeds showed that this strength was likely only reached very punctually. Thus, Milton turned out to be an event that bore some similarities to Hurricane Ian in 2022 in terms of its trajectory, but is likely to cause far less damage to the reinsurance industry due to its much lower strength. Capital losses on positions in the portfolio are therefore not expected. The increased volatility in the valuation of ILS securities observed towards the end of the month should calm down in the coming weeks.

Traditionally, a first gauging of the conditions of the year-end renewal round takes place at the annual reinsurance rendez-vous in Monte Carlo. With hurricanes Helene and Milton, the two biggest insurance events of the year so far, occurring only after the Monte Carlo meetings, the outlook for attractive year-end deals improved further for the reinsurance and ILS industry. In October, issuance activity also picked up again in the cat bond market. Various bonds with US and European risks came to the market with a total volume of over USD 1bn. The coupons of the new issues confirmed the level of the current good spreads of the ILS market.
