SOLIDUM PARTNERS

Solidum Event Linked Securities Fund Limited - SAC Fund 2

Classes A-2
October 31, 2025

Fund objective

The Solidum ELS Fund is an open-end fund registered in Bermuda. The Fund's objective is to achieve long term capital appreciation and low correlation to fixed income, equity and non-traditional investments. The Fund holds a diversified portfolio of insurance linked securities which can have the structural format of catastrophe bonds, notes and derivatives, industry loss warranties, sidecars, reinsurance contracts or other instruments transferring insurance event risk or genuine insurance underwriting risk. As the insurance event linked securities market evolves, new products may become available and the Fund may also invest in such products. The portfolio is actively managed in an attempt to achieve optimal returns in the context of the prevailing market environment. Leverage can be used in order to enhance investment returns, and active hedging may be employed to minimize downside risk.
In addition to its functional currency USD, the Fund offers CHF, EUR and GBP share classes. The equity capital of the non-USD share classes is hedged to reduce FX effects. Institutional share classes are available for investments above defined thresholds.

Manager comment

During October, the fund achieved a very pleasing result of 1.27% and 1.38% in the two currency classes.

As expected, towards the end of the hurricane season the storm activity shifted from the Atlantic towards the Caribbean and the Gulf of Mexico. The most remarkable event of the month was Hurricane Melissa: Around midday of October 28, Hurricane Melissa made landfall in Jamaica as a category 5 storm with sustained 1-minute wind speed of 295 km/h and a central pressure of 892 mbar. With these physical parameters, Melissa is the strongest storm to have hit the island since the beginning of the records in 1850.

Even though damage inflicted by Melissa on Jamaica is devastating, the storm's impact on the ILS and cat bond market is manageable: One catastrophe bond issued by the International Bank for Reconstruction and Development (IBRD) for the Government of Jamaica incurred a total loss. This bond is structured on a parametric basis whereby the loss payout is driven by the barometric pressure measured on Melissa's track over Jamaica.

Solidum Partners did not invest in this bond as we considered some structural features of the parametric trigger leading to a risk profile that was not adequately compensated by the bond's coupon.
